step 1

sort items descending by support

item	support
C	4
D	4
A	3
B	3
E	3
F	3

step 2

sort items in transaction in descending order of support

t3	CBF
t4	CDAEF
t5	DB

step 3

construct FP-tree (R) by adding each of the transactions
 this serves as an index in lieu of original db
 See fig. R in attachement.

step 4

See respective figures in attachement.
